Mediterranean Spain Costas Sol & Blanca WAYPOINTS

© RCC Pilotage Foundation 2009

Caution. Users should note that this file is an Appendix to the book 'Costas del Sol and Blanca' 6th Edition for which supplements may be issued; the cautions and notes recorded on page ii of that book apply. Users are reminded that WPs are offered as an aid to navigation. Whilst every effort has been made to ensure their accuracy, none has been proved at sea, no assumption may be made that direct passage is possible between any two (unless the text specifically states that it may), and all should be used in conjunction with visual or other observation.

To the extent permitted by law, the RCC Pilotage Foundation and the authors do not accept liability for any loss and/or damage howsoever caused that may arise from reliance on information contained in these pages.

WPs Costas del Sol & Blanca

The WPs in bold form a series with which one is able to steer from off Gibraltar to Cap de La Nao. All WPs are derived from electronic charts to WGS84 from source material at European Datum 50

The numerical sequence does not signify that a route may be safely selected from a coastal waypoint to harbour. Navigators must plot their own routes taking note of the numerous fish farms and other obstacles along this coastline.

Ch I Entrance to the Mediterranean
