SOUTH BISCAY – WAYPOINTS

© RCC Pilotage Foundation 2006

Caution. Users should note that this file is an Appendix to the book 'South Biscay' for which supplements may have been issued; the cautions and notes recorded on page iv of that book apply. Users are reminded that WPs are offered as an aid to navigation. Whilst every effort has been made to ensure their accuracy, none has been proved at sea, no assumption may be made that direct passage is possible between any two (unless the text specifically states that it may – and see below), and all should be used in conjunction with visual or other observation). Some charts in this area may not have been converted to WGS 84 and care should be taken to check datum and apply any correction when plotting.

To the extent permitted by law, the RCC Pilotage Foundation and the authors do not accept liability for any loss and/or damage howsoever caused that may arise from reliance on information contained in these

There are clear direct tracks carrying at least 2m to a width of 400m between adjacent waypoints unless the space between is marked with * * * * *. Nevertheless the waypoints and the tracks between them must be plotted and checked on an up-to-date chart before being used for navigation.

Waypoints marked ** are in La Gironde river and are for planning purposes only.

Part I
